

Main Project Abstract

NEW MANAMA SUPERMARKET

VANI PRASAD, S6-58

Department of Computer Applications

Rajiv Gandhi Institute of Technology, Kottayam

The Project Supermarket Management System deals with the automation of supermarket. It includes both sales and purchase of items. The project Supermarket Management System is developed with the objective of making the system reliable, easier, fast, and more informative. There is a lot of reason for the introduction of this project. In the manual System, there are number of inefficiencies that a salesperson faces.

The project Reward Management System deals with the automation of super coin/reward management in a supermarket. The project is developed with the objective of making the system reliable, easier, fast and more informative. Here we have a set of customers with their super coins. The main objective of this project is, the unsold products are added to the offer list and it given to the customers as a reward/gift voucher, so it will give happiness to the supermarket and as well as the customers.
